Department of Agriculture Forest Service (USFS) call for research proposals in 2001 addressed rebuilding USFS capability to address problems in fire-adapted ecosystems and in the wildland-urban interface. This effort supported the National Fire Plan and the 10-year comprehensive fire strategy. The National Fire Plan goals were to ensure sufficient firefighting resources for the future, rehabilitate and restore fire-damaged ecosystems, reduce fuels (combustible forest materials) in forests and rangelands at risk, especially near communities, and work with local residents to reduce fire risk and improve fire protection. Each proposal included the proposed research, development, and implementation activities that would be undertaken over a 5-year period, as well as the expected outcomes from these activities. The major topic headings for proposals were firefighting, rehabilitation and recovery, hazardous fuel reduction, and community assistance. Funding was distributed according to a formula developed by national team leaders within the USFS with firefighting receiving 34 percent of the funds, rehabilitation and recovery 20 percent, hazardous fuel reduction 35 percent, community assistance 10 percent, and Washington office administration 1 percent.
