

Microcrystalline Silicon Solar Cells: Final Technical Progress Report

By National Renewable Energy Laboratory (NREL)

Bibliogov, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.The objective of the research under this subcontract is to explore, identify, evaluate, and develop non-conventional photovoltaic technologies capable of making a breakthrough in the production of low-cost electricity from sunlight. The specific objectives are to 1) develop microwave glow-discharge parameters for the deposition of high-quality microcrystalline silicon (mc-Si: H) thin films at high rate, 2) characterize this microcrystalline material, and 3) fabricate high-efficiency microcrystalline nip solar cells.

Reviews

An exceptional pdf and the typeface utilized was fascinating to read through. It can be written in straightforward words and phrases instead of confusing. I am just quickly could possibly get a delight of looking at a written ebook.

-- Prof. Arlie Bogan

It is in a single of the best book. This is for those who state there had not been a well worth reading through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Dr. Barney Robel Jr.
